

2022 Business Future Index:  
The Great Acceleration

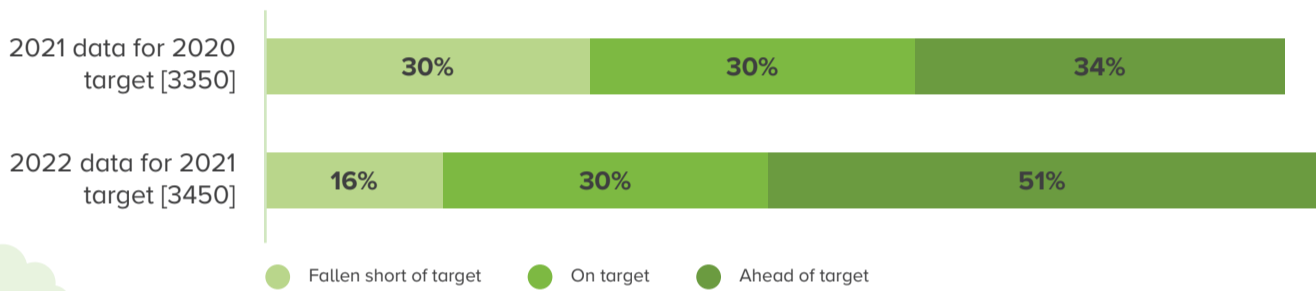

# The impact accelerated change can have on your organization's bottom line

Embracing innovation in a time of crisis will help organizations survive future economic uncertainty and protect **the bottom line**.

## Business Performance

Business performance is up in 2022, suggesting organizations are maximizing the accelerations they've experienced.

### Performance against target

This increase from 34% in 2021 to 51% in 2022 demonstrates the impact that investments in digitalization, flexible working, and productivity tools can have on the bottom line.

<b>2021</b>	<b>2022</b>
<b>51%</b>	<b>60%</b>

Of those surveyed reported exceeding expectations over the past three years.

Organizations have hardened their resilience.

<b>2021</b>	<b>2022</b>
<b>63%</b>	<b>67%</b>

Organizations reported that their ability to be resilient – and to continue to perform in the face of adversity - was strong, with them either being very capable of it or having no need to improve it at all.
